- You will be equipped with theoretical and practical knowledge.

Career opportunities for you

- production specialist
- logistics specialist
- supply chain management specialist
- production logistics specialist
- production data administration specialist

"

What are my passions? I am an amateur photographer and short film director. The biggest thrill, however, something that provides most fun is the post-production process and image processing. It's time consuming, true, but I find it the most satisfying part of the process. Perhaps one day I will turn this passion into a profitable business. I am thinking about running my own company; that's one of the reasons why I chose management as a field of study. I believe that I have the qualities which, combined with professional knowledge, will guarantee me success in career-wise. When I need to charge my "batteries" and boost my motivation I go to the mountains. Climbing is a challenge, but after winning every next summit, I feel that nothing is impossible for me.
